### PROMPT SETTLEMENT SHOULD COUNT.

The United States Government is evidently confronted with the necessity of giving France better terms than were given to Britain if France is to be induced to pay its war debt. The British Government has made known that it would protest any such arrangement, and unless further negotiations are forthcoming from the U.S. papers that should be held in view in France there may be no change in the conditions agreed to by Britain. While these assurances lack authority, they have the weight of probability. The United States would hardly want to penalize Britain for having settled early, and to honor France for having refused to do so. It is quite likely that France and other continental countries would have continued to ignore their debt obligations to the United States indefinitely if Britain had not led the way and thus put them in the position of delinquents. For that service Britain may fairly expect some compensation from France, or any other laggard, paying a lower rate of interest or other discriminating concession.

### MORE NON MIXERS?

There are said to be 30,000 Mennonites in Russia who want to come to Canada, but are too poor to come, while the Soviet will not let them leave. Without wishing them any bad luck, there will be a pretty general hope in the minds of the people that another somewhat formalized army is keeping out arms and equipment, and that under one guise or another a somewhat formalized army is kept in reserve. The only reason that "the military control mission" is not controlling and is not in position to do so. That is not the first time that a report of similar nature has come from the same source. The circumstances give it rather more significance than may have attached to former reports.

Germany has just accepted the Dawes plan for giving reparations claims, together with an international loan of two hundred million dollars with which to spur up its industries and resume functions as a world trading country. The loan can now be no longer under consideration.

The question of France to come. The question is whether the conditions upon which the loan was made are to be kept. It may be that Germany has undergone a change of heart and is now resolved to make an effort to pay. But the course of events during the last six years throw doubts upon that assumption, and the report from the central commission to strengthen this. Preparing for the "next war" does not look like preparing to pay the damages assessed on account of the last one.

### PREPARING FOR SOMETHING.

The Allied commission that is supposed to control military activities in Germany reports that the general staff is still holding sessions as in previous days, that the munition factories are turning out arms and equipment, and that under one guise or another a somewhat formalized army is kept in reserve. The only reason that "the military control mission" is not controlling and is not in position to do so. That is not the first time that a report of similar nature has come from the same source. The circumstances give it rather more significance than may have attached to former reports.

Germany has just accepted the Dawes plan for giving reparations claims, together with an international loan of two hundred million dollars with which to spur up its industries and resume functions as a world trading country. The loan can now be no longer under consideration.

### THE GREAT WINTER GAME.

The Eskimos got away to a bad start on Thursday evening when the Calgary Tigers took the initial honors by a close score. The ice, however, was not considered fit for the game, and the game was a matter of loss and not good playing up to date. With me more like the kind that Edmonton teams are used to the result might have been different. If games have to be lost, the opening of the season is the best time to lose them. There is plenty of time to recover the handicap, and the Eskimos did not show that they expected to get a worthy account of themselves before spring.

In Western Canada the opening of the hockey season corresponds to the commencement of the baseball season in the United States. Not forgetting the roaring game of pick-aching and the major events are a general interest beyond that of any other class of athletic contests. It is a sport alike suited to the climatic conditions of the country and to the development of strength, skill and staying power on the part of the players. As far as the game is concerned it provides for the interests of a hardy Canadian民族. Canadian hockey teams must hold world records agains all comers, and in future they will be largely recruited from the boys who learn the art and gain the dexterity on the ponds and rinks of the prairie provinces.

### THE "NOT FORGOTTEN" FUND.

In the hospital on the south side of the river, are ninety men who fought for Canada in the great war. Some of them have been in hospital since before the armistice was signed. Some have had to go to hospital for treatment because of the currency of trouble from injuries received in the struggle. Some perhaps will never leave their beds while they live. These are men to whom the country can never pay its debt.

There is no organization whose specific object is to provide Christians funds for these men to meet their expenses. The Bulletin is appealing to its readers for contributions. Summes, large or small, and suitable articles for seasonal reminders, will be gladly received and duly acknowledged in these columns. The contributions so obtained will be turned over to the Red Cross organization, which in bringing as much as possible of the joy of the Christmas time to the heirs of these sufferers.

The calls upon the generosity of the public are many, but the case of these stricken men is commended to the reader as one of special merit and of the utmost urgency. So many are the other claims for aid, that it is difficult, unless more are provided in this way, that the funds so received may be overlooked. That tragedy must not be allowed to happen. These men must be made to know that we have not forgotten, and that we are grateful.

### PROVISION FOR NON CONCURRENCE

In the Act passed at the last session of Parliament, the right of the United Church of Canada to provision was made for non-concurrence. In connection with any of the negotiations, which may remain outside the union if such is declared to be the desire by a majority vote taken at a congregational meeting. Such meetings must be held within six months of the date fixed for the coming into force of the act, January 1, next. The period began on Monday of the present week, and congregational meetings for the purpose of considering the matter are now in legal order.

It is set out in the Act how the meetings are to be called and the votes taken. In the event of a motion to the contrary not being passed at a meeting for the purpose of a non-concurrence, any of the three church bodies, automatically a unit in the original organization. Action is therefore necessary only when it is desired to remain out of the union. Only members of the congregation concerned are entitled to vote at meetings, unless otherwise directed by the provisions made by provincial statute. The word "non" means the right to take a vote, not the right to propose. A meeting called to vote on the question may adjourn, for the purpose of allowing a ballot to be taken, but not for more than thirty days.

As a congregational action, a meeting of the members is provided for. "Then, and in case the property, real and personal belongings, held in trust for or to the use of such a consuming congregation shall remain unaffected by this Act, except that any church formed by separating congregations of the respective associations, and in which such a congregation or the entire shall remain in the place of the respective negotiating churches, in respect to any rights relating to such property, and except that in respect of any such congregation which does not enter any church as formed such property shall be held by the existing trustees or other

## WHAT ALBERTA REALLY NEEDS

(By T. L. Irwin)

In seeking a solution that will settle general conditions in the Province of Alberta, the suggestion along the lines of an Immigration or Colonization scheme might be the best, and own that in the Western provinces there are great numbers of experienced and capable men who are financially sound, as a result of their experience. They are seeking other fields on account of a change in conditions in their present locality. The soil is lighter crops and possibly reduced upon them. They are ready for new opportunities, and the majority of them do not know where.

### Alberta Has Advantages

It is often said that sufficient land is available in Alberta to accommodate the incoming settlers. Be that as it may, the facts do not affect the feasibility of our lands by advance planning, and the possibilities of plenty in the quantity this quantity deserves. And because of the fact that we have all the land we are still more or less in position to do so.

Admitted that the war was offered a serious handicap, but it was overcome.

Again, it was over six years ago. Again, it is admitted, that the financial and communicative tendencies to staple agriculture are strong, and with the renewal of the Republican Government in the United States, there is a chance for us to do better than we did six years ago.

The world is like a stick upon which we have come naturally an optimistic outcome therefore for considering in all seriousness ways to improve our rural conditions and for bringing prosperity within our boundaries.

Alberta depends first and last upon the soil, and he who is entitled to every help and every consideration, such as reduced taxation should be the goal of every individual. No doubt here we are the general desire in the past,

presented only from realization by strained conditions. But the question is, whether or not this much desired status cannot be brought about by the use of the land, and the timber, that is to say, a move which exploitation of our natural resources and which will bring Alberta farmers of prosperous and permanent establishment.

### To Settle Land.

To return again to the suggestion of an immigration scheme, the improved our improved farming districts, and the number of these are hundreds, if not thousands, of well-to-do and experienced farmers, and the conditions for re-settlement in just these areas are favorable. To fully acquire the land, what we have to do is to offer to facilitate the exchange of our lands by advance planning, and the possibilities are surely the thing to do.

The present crying need in our agricultural districts is the coming of the homesteader to the land, and the increase of settlement by advanced districts adjoining transportation by railroads. The more we have the similar conditions, who have the opportunity to establish our farming communities.

With the influx of an immigration of this nature, rural conditions will improve, and the factory improvement. Districts will be well populated, and the general benefit which the circulation of new money would be to the purchasing power of the people and lumber would have to be purchased, and enterprises would in themselves prove very excellent farms, and friends and relatives in their original communities would be encouraged to come, and regarding our opportunities and possibilities.

There are many choice districts in Alberta, and many improved farms that can be purchased something along the lines suggested could be among the very wise and judicious moves.

### AT THE EMMANUEL A.M.E. CHURCH SUNDAY

At the regular services of the Emmanuel A.M.E. Church, Sunday morning, the sermon will be the Hidden Word, while in the evening, Dr. John C. Jackson, of the Sunday School will meet at 12.45, the Sunbeam Club at 1.15, the Young People's Club at 2.15, the League at 3.30. The Class meeting.

The trustees' board will meet Monday evening at 7.30, the Little Junks, Copper Women's, Misses' Missionary Society, and the Senior Juniors.

The trustees' supper will be on Friday, December 20, at the parsonage.

The Minnie D. Jones Junior Mission Society was organized Wednesday evening, Dec. 12, at the home of Mrs. Mrs. Phillips. The officers are as follows: President, Mrs. Phillips; Vice-president, Mrs. C. Brown; Assistant Vice-president, Mrs. H. E. Jones; Secretary, Mrs. C. Brown; Treasurer, Mrs. E. H. Jones; Committee: chairman, Ruby Pennington; Vice-chairman, Dorothy Catton; chairman of looks committee, Morris Wagner.

### ASSISTANT COMMISSIONER

A member of the Board of the R.N.W.M.P. and later associated with the R.M.P., Captain G. H. Jones of Prince Albert, has been gazetted Assistant Commissioner. Wroughton, formerly the force's chief constable, was promoted to Superintendent in 1912 and is well known throughout the west.

There are many matters commanding the attention of the public, and the most important is the question of the proposed new constitution for the Dominion.

It is a question that has been

the Federal Appeal Board which sat here all week for the hearing of the case of the proposed new constitution.

After the hearing, the panel of judges will be written in all of the cases heard during the trip through the West, and the head and six Imperial soldiers will be present to witness the presentation to the Imperial Board.

Captain W. C. Mackintosh, secretary of the Royal Canadian Legion, here in February or early in March, was chairman and with him were Commanders H. A. Bowie and H. W. Williams.

### DISABLED MEN TO MEET

A general meeting of the Brotherhood of Disabled Veterans will be held at the Hotel Alberta, 1020 Block, Jasper Avenue, Sunday afternoon, Dec. 15, at 3 p.m. G. North, president, will be in attendance. All members are asked to attend.

### INSPECTING ELEVATOR

A Herzberg, architect, Board of Governors Commissioners and G. North were in the city yesterday making an inspection of the new elevator.

**A GRAND MEDICINE FOR LITTLE ONES**

Mr. Avila Nee, Haar Lampson, N. B., writes: "I can highly recommend Dr. Roy's 'Taliesin' as they have wonderful wonders in the case of my son, who is now 10 years old. He had a cold for two weeks, and I thought he ought to give serious consideration to the fact that at present it doesn't cool him enough. Opportunity to get rid of the cold is the best opportunity to get rid of the cold, and where the clubhouse is concerned, I created an atmosphere where the children can have a sharp challenge, the required for a good steam yacht. Clubhouses should be bigger and more roomy, and there should be a little theater, where motion pictures might be shown to the garter's wife and children while following the west."

Real seeds retain their germinating power for 17 years.

### Twenty Years Ago

From the file of the Daily Bulletin, December 13, 1904.

The weather—Maximum 24° minimum 10°.

The first civic elections of the city of Edmonton were held yesterday. The following men will sit with the council, with the names of the newly formed party indicated: Mr. George McKenna, by acclamation; aldermen, Charles May, J. R. Boyle, W. C. Mackintosh, H. C. Clark, J. H. Pheasant, A. Green, and H. Clarke. Mayor, D. R. Frazer. The names are given in the order of their finish. Mr. Moling, a very heavy man, was elected mayor, and his term of office will be for two years and the other four years.

There were a total of 18 candidates in the election, and the final figure was very close.

## STREETS OF CITY TO BE WIDENED

LOS ANGELES, Dec. 12.—Los Angeles officials are making plans to widen the approaches of its streets for the improvement of its streets.

The plan has been sanctioned at the election by the voters approved of the measure.

The call for adoption of a city-wide street plan prepared by the city engineer's office provides for an approach to provide the city's portion of the cost of the plan and proposed traffic relief.

The entire cost of the development will be borne by the city.

The work includes widening of the main approaches, the extension of heavily traveled streets and the construction of new approaches along scientific lines.

Los Angeles has more automobiles in proportion to the population than any other city, but it has only one-half as many drivers who annually add one-third to the number of accidents.

More than 400,000 residents leave the city every day, and during the year there are 1,000,000 visitors from other states, making the problem of handling the traffic here more difficult.

## MOTOR HINTS

BY ISRAEL KLEIN

The great winter dread of motorists is to be frozen out of their cars. There are other features about winter driving which are equally important.

The driver, his driving, parts of the oil system and the batteries must be taken during cold weather.

As essential as the water cooling system is in summer, the heater must be taken during cold weather.

As an oil filter, the water cooling system is simple operations taken care of it and prevents the causing of the oil to freeze.

CARBURATOR—This needs adjustment to the heat of the engine.

To help in starting, also, the engine must be run until the oil is warm enough.

Watch the oil temperature, however, these features should be watched.

The lighter lubricating oil is usually used in cold weather, however, this makes starting difficult.

The oil must be run to the engine.

Watch the oil and let the engine run slowly.

BATTERY—Keep the battery charged and filled.

Watch the water.

The best motor oil liquid is denatured alcohol. Used in proper proportions, it is safe and effective against the coldness expected.

CARBURETOR—This needs adjustment to the heat of the engine.

To help in starting, also, the engine must be run until the oil is warm enough.

Watch the oil temperature, however, these features should be watched.

The lighter lubricating oil is usually used in cold weather, however, this makes starting difficult.

The oil must be run to the engine.

Watch the oil and let the engine run slowly.

ELIMINATE SCRATCHES

SCRATCHES ON A FINELY POLISHED AUTOMOBILE CAN BE ELIMINATED BY SPONGE DIPPING IN WATER AND DRYING UNTIL THE SCRATCH HAS BEEN COMpletely FILLED.

THIS IS THE LOGIC OF LIGHTNING FROM RADIO ANTENNAS GIVEN THE FINAL AUTHORITY BY THE DEPARTMENT OF JUSTICE.

According to an announcement just issued from this department, the radio station's contention against lightning, yet they are still allowed to do so.

Although in a year or two of their inviting fire from lightning,

they are still allowed to do so.

## BUYING STRONG WHEAT MARKET

Values Move to Higher Level  
—Demand Fairly Steady  
Now.

WINNIPEG, Dec. 13.—After a somewhat easier session today's wheat market has come into strong demand, with buyers seeking to meet buying which sent shorts to cover and no price worked upward rapidly. The clip, which was around the highest point during the week, was higher for Decembers, 3-2-2 for May and 2-1 cents for July. Both live and green Alcan cereals were weak in the opening session, but rose later. There was very little trading in wheat, but the grain market stocks of contract grade wheat is reflected in the good buy offers. The market is still in a position to move higher, but became very active later, with old editions of the bush market developing some strength. The market was up some light liquidation from longs, but the pressure was not heavy, but the pressure was not heavy, but all offerings were weak.

A feature of the market was the steady rise in the price of oats under May, a discount sixteen cent at the start of the year, giving control of the market to the buyers of hedges.

The future canola grains continued to follow the trend of wheat with a decided increase in demand, making a large trade well balanced.

Barley and oats were quiet. Oats may 1-2 cents, about 2-2, while the future grain market was up by one cent, and advanced 2-2 cents.

With offerings light and the demand strong, there was little interest in the cash wheat in any quantity.

Number four oats were down by one cent, while the small and medium grades of barley were in fair demand. Oats and rye had quiet.

### Local Grain Markets

Edmonton prices based on the futures market, as follows:

**WHEAT—** Number 1 Northern 140; Number 2 130; Number 3 120; Number 4 110; Number 5 100; Number 6 90; Feed 80.
